

RAPID STICKING LINE™

The affordable **MODULAR** sticking line

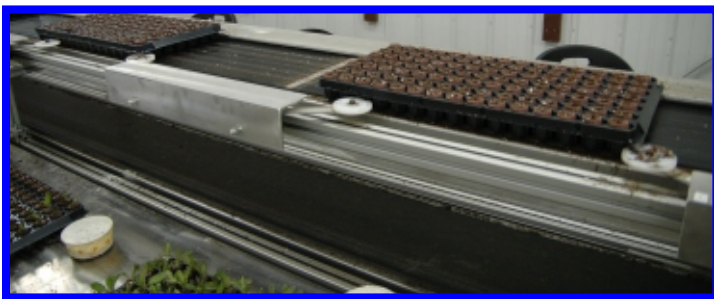

THE U.S.A.

By mechanizing your sticking crew, you can expect a substantial increase in productivity.

Built from steel and finished with black powder coat, this sticking line will provide a steady flow of material to your crew. Available in 6,12,18, 24 station models. Can be integrated to with your filler or Ellegaard machine.

Our modular design allows you to start small and add on as your production grows!

HOW IT WORKS

Empty trays are staged to the top conveyor where mechanical gates stop the tray at each work station. When a tray is removed, more are released onto the top conveyor. This provides a constant supply of product for your crew.

After sticking, the tray is placed on the bottom conveyor to be transferred to a watering conveyor and finally the greenhouse.

Your sticking crew will be more productive resulting in reduced labor for years to come.

RAPID AUTOMATED

6673 Pine Ridge Ct., Suite B
Jenison, MI 49428

PH: 616-662-0954

FEATURES:

- Folding stainless steel tables
- Variable speed conveyors
- Low profile top conveyor minimizes reach for workers
